

## CARE & HANDLING FOR CLEAR/TINTED PVC BLINDS

### CLEANING

Gently hose down to remove any dust. Clean with a dilute solution of mild soap only and warm water. Take care not to rub dirt or grit into surface. Scratching will result. Rinse and dry with a soft cloth. For a really good finish polish with "ViewPlex". Follow the instructions on the can. Don't use chemicals clean regularly to prevent grit build up.

### MOWING

Always roll up the blind before mowing or trimming near by.

### STORMS

It is not designed to withstand storms. Always roll up the blind in strong winds.

### DO NOT LEAVE ROLLED UP FOR LONG PERIODS

The longer it is rolled up the longer it will take for the wrinkles to come out.

### DO NOT LEAVE ROLLED UP IN DIRECT SUNLIGHT

Heat can build up inside the roll damaging the PVC.

### AVOID ROLLING UP WHILST WET

PVC can absorb water which can show up as cloudy residue. This will eventually disappear if the blind is left unrolled in the sun.

### DO NOT ROLL OUTWARDS

Dirt and moisture can build up in the roll staining the PVC

### FLAMMABLE

Keep hot surfaces and flames away.
