Thank you for contacting us. I am pleased to submit to you our quotation for the supply of a Betta Marquee. Our industry is growing strongly and some competitors will attempt to gain sales by offering inferior imitations based on lighter (and weaker) 30mm x 30mm square frame legs. May I suggest if you are obtaining quotes from other suppliers that you compare the frame specifications first; and then the price.

### Frames Specifications

Our industry-leading aluminium frames offer superior strength using 40mm hexagonal leg sections. The scissor bars are 25mm x 12mm square section with a 1.5mm wall thickness. The nylon joints offer strength and reliability found in more expensive commercial grade models. They are designed to withstand wind speeds of up to 35 knots and its extra strength enables us to offer a two year workmanship warranty.

### Canopy

Our PVC-lined polyester canopy is completely waterproof and has an Australian Government Certified UPF of 50+ providing excellent protection from UV rays. Secured to the frame with Velcro, the canopy can remain on the frame when stowing in its carry bag.

### Inclusions

Our aluminium framed marquees are shipped in a wheeled carry/ storage bag with ropes and steel pegs for fixing to the ground. It is a condition of warranty that the marquee be properly anchored or otherwise restrained when in use.

### Accessories

Options include Weight Bags (\$100.00 for a set of four), and wall kits, which are shipped as a set of four in their own carry/ storage bag. One wall has a zippered doorway for access whenever all four walls are fitted. Wall panels are secured to the frame and canopy with Velcro and are joined to each other with marine-grade nylon zip fasteners.

### Sign writing

A screen printed branding option is also available. We can print in a number of colours onto the roof and/ or fascia (valance) area of the canopy. We allow up to 21 days for delivery of printed product and seek a 50% deposit with orders for same. Artwork needs to be submitted in the form of an EPS vector art file (as produced by CorelDraw, Adobe Illustrator). PMS colours should also be specified where known.
